FOR IMMEDIATE RELEASE

Hyperkin and HTC VIVE Collaborate to Release the Hyper Blaster Retro-Style Gun for the HTC VIVE and VIVE Tracker

November 16, 2017 (Los Angeles, Calif.) Hyperkin, a video game hardware development company from Los Angeles, has announced the Hyper Blaster, a virtual reality gun peripheral for the upcoming HTC Vive Tracker. Directly collaborating with HTC VIVE, the leader in room-scale VR, Hyperkin has created the ultimate retro light gun experience for anyone - available for pre-order today.

Recently showcased at this year's E3 and PAX West, the Hyper Blaster attaches directly to the Vive Tracker, a VR peripheral for HTC Vive that brings new form factors and experiences into VR. The Hyper Blaster is bundled with *Duck Season*, a first-person hunting game developed by [Stress Level Zero](#) as an homage to 80s light gun shooters with a suspenseful, dark story waiting to be unraveled. Hyperkin Product Developer, Chris Gallizzi, has been working on multiple VR projects since the beginning of the current generation of VR, but the Hyper Blaster has probably been his team's most prolific to date.

"The Hyper Blaster is the first step into building a much larger ecosystem for not only VIVE but VR for consumers," Gallizzi said. "The developer support from VIVE and Stress Level Zero is a clear reminder into how amazing it is to work in this industry."

The Hyper Blaster, available for pre-order today, is also available on [Amazon](#). It includes *Duck Season* as a pack-in title and one Vive Tracker, all for \$149.99. Other Hyper Blaster-integrated titles include Arizona Sunshine, The American Dream VR, Operation Warcade, and Practisim VR. The Vive Tracker is also available for individual consumer purchase today at [Vive.com](#).

About HTC VIVE

VIVE is a first-of-its-kind virtual reality platform, built and optimized for room-scale VR and true-to-life interactions. Delivering on the promise of VR with game-changing technology and best-in-class content, Vive has created the strongest ecosystem for VR hardware and software, bringing VR to consumers, developers and enterprises alike. The Vive ecosystem is built around the best VR hardware in market, supported by Vive X, a \$100 million accelerator for VR and related technology start-ups, Viveport, a global platform and app store for VR that operates in more than 30 countries, and Vive Studios, its VR content development and publishing initiative.
